

A call for maxis

Bitcoin for freedom

Prelude

Bitcoin is the most powerful political instrument of our time in the hands of the people. For it deprives governments of their most horrendous intergenerational weapon of mass destruction that has traumatized people for ages. Fiat money.

Considering the ongoing tragedy in our country, which has yet again manifested itself in the murder of **Mahsa Amini** and numerous others, as well as the imprisonment of a plethora of our compatriots and colleagues like **Ziya** and **Jadi**, it is obvious that we have to act promptly and conclusively to contribute as much as we can to stopping these atrocities for good.

Recent activities of the Central Bank of Iran in rolling out the Digital Rial, which will consolidate a never seen before tyranny, able to capture, inspect, invade, and avert, even the thoughts that are yet to be conceived, calls for urgent and decisive action.

This is a call for action.

Who are we?

A group of Iranian bitcoin maxis,
committed to making bitcoin accessible for all,
who believe they can help fix the country by fixing the money.

What are we planning to do? – now for Iran

Build a simple, easy-to-use, bitcoin-only, mobile wallet in Farsi and English in order to provide people with an extremely easy-to-use option to gradually move away from rial to bitcoin.

Establish a team of bitcoiners to diffuse the counter attacks as they happen down the road.

We prioritize the security of the team above all.

What are we planning to do? – after liberation

Establish a bitcoin-only corporation

For individuals

Education

Personal open-source bitcoin/lightning wallet with advanced features

Simplified non-custodial disaster recovery services

Estate planning 

Bitcoin / fiat exchange 

Micro mining 

Hardware wallets 

Seed plates 

Retail fiat lending against bitcoin 

For institutions

Bitcoin treasury services 

Custody services 

Bitcoin-based financial instruments 

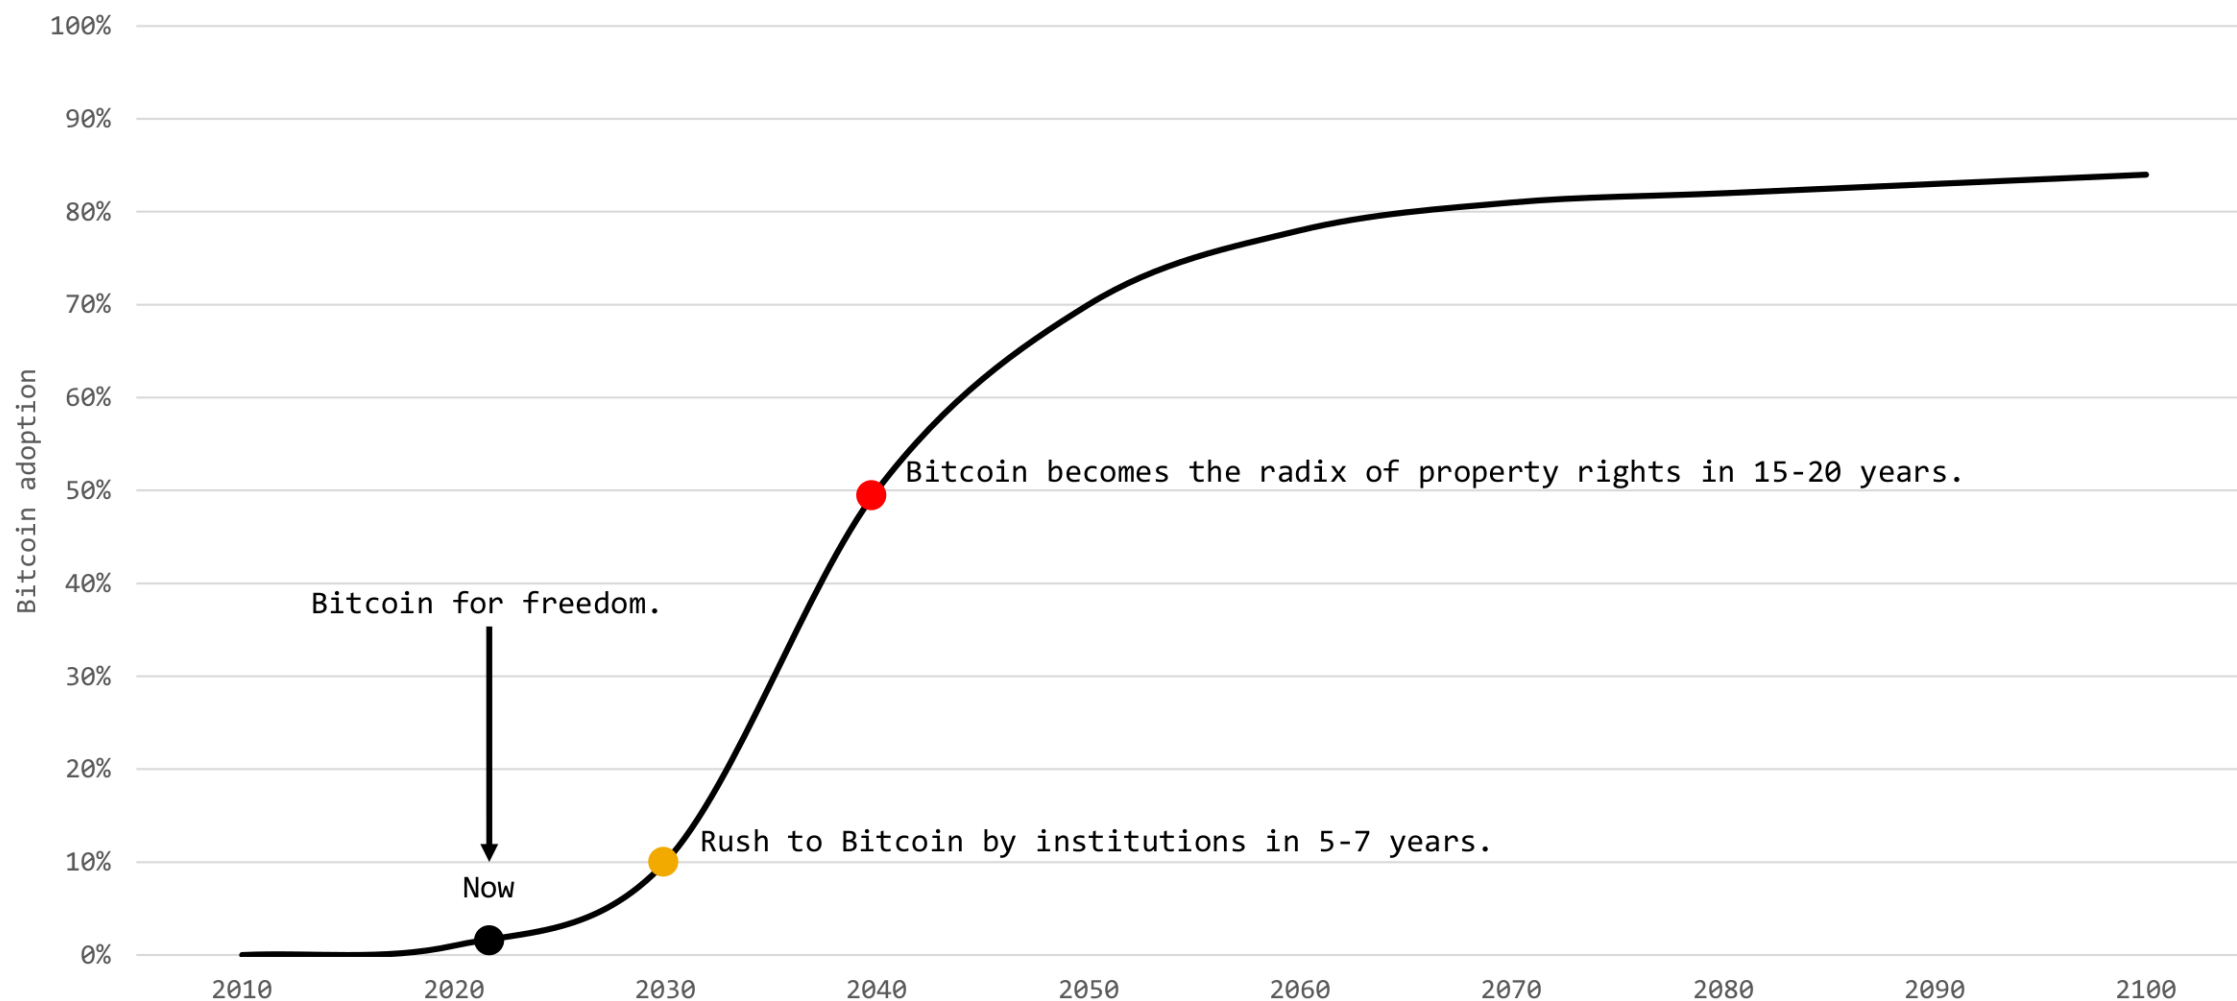

An institutional bitcoin wallet, capable of implementing corporate governance structures 

Security protocol design 

Bitcoin business continuity management services 

What is the grand vision?

What are our principles?

We are bitcoin only.

We are people-bitcoin-first, not money-first.

Self-sovereignty is a must.

We don't impair property rights, whatever the cost.

We are not nosey.

We don't taint bitcoins.

Adversarial is our middle name.

Privacy and anonymity must be observed diligently for those of us living in Iran.

What do we need?

We need to expand our team to take things off the ground faster.

We need technically capable bitcoiners.

We need software engineers, preferably acquainted with rust.

We have reputable investors. Let us know if you are eager to join them.

Contact us if you want to join the endeavor
